Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or render obvious the instantly claimed process of making water dispersible granules, comprising a premix containing a diluent wherein at least one component is a liquid wherein a paste/dough is not formed in the premix and is fed to an extruder as a free-flowing powder.

The closest prior art Lloyd et al. and Hobbs all teach that a dough is formed in the premix. Sandell has a powdery premix (ie. milled) but does not use water and appears that no other liquid is added to the premix.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
